

Textbooks

The following are guidelines for the selection of textbooks:

1. Textbooks should be evaluated according to their instructional effectiveness and should be in line with a school's objectives. The curriculum needs of individual students is also an important consideration.
2. Textbooks should be purchased on a planned, rotating basis so as to provide students with texts that are contemporary, accurate and educationally sound.
3. At the time textbook purchases or evaluations are made, the list of recommended texts contained in the *Curriculum Guidelines of the Diocese of Marquette* should be utilized as a reference source.
